

REMARKS

Claims 1-7 are pending in the application.

Claims 1 and 3 are amended above to overcome the examiner's specification objection.

The examiner objected to the specification in the Final Rejection for failing to include antecedent basis for allegedly failing to describe the "seal adapted to seal against the periphery of the user's face when worn".

The examiner's objection is overcome by amending claims 1 and 3 above to replace the term "seal" with the term "gasket" as the examiner suggested in the March 9, 2009 Advisory Action.

Entry of the claim amendments above is respectfully requested since it will reduce the number of issues on appeal.

Date: April 7, 2009
